Art Unit: 3725

DETAILED ACTION

Claim Objections

Claim 6 depends upon a later claim i.e. claim 7. Correction is required. Note that claim 6 and claims 13-14 which depend on claim 6 have not been treated on their merits.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4,7,9 are rejected under 35 U.S.C. 102(b) as being anticipated by the German '478 patent. This patent discloses a paper shredder pivotally mounted to a bin; note particularly figures 2 and 3.

Claim 25 is rejected under 35 U.S.C. 102(b) as being anticipated by the German '752 patent. This patent shows a paper shredder having handle 17.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 5,11,16 are rejected under 35 U.S.C. 103(a) as being unpatentable over the German '478 patent. The limitations of these claims would have been obvious

Application/Control Number: 10/828,254

Art Unit: 3725

design choices only once the basic apparatus was known. For example, the exact type of pivot used would have been a design choice only once it was known to pivot one member in respect to the other as in the German patent.

Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over the German '478 patent as applied to claim 1 above, and further in view of the German '139 patent. The seat of the German '478 patent is not removable. This may result in maintenance problems. The German '139 patent shows similar apparatus including the use of a removable seat. In order to prevent maintenance problems, it would have been obvious for one of ordinary skill in the art to modify the German '478 apparatus by providing a removable seat, taught to be desirable by the German '139 patent.

Claims 8,10,12,17-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over the German '478 patent as applied to claim 1 above, and further in view of the German '752 patent. The German '478 patent does not show the use of an enlarged opening for unshredded material and the provision of a typical handle. This limits apparatus versatility. The German '752 patent solves this problem by disclosing similar apparatus including the use of an enlarged opening for unshredded material and a handle for lifting purpose. In order to render the apparatus more versatile, it would have been obvious for one of ordinary skill in the art to modify the German '478 apparatus by providing an enlarged opening and a handle, taught to be desirable by the German '752 patent. Any remaining limitations would then have been obvious design choices only as they solve no stated problems.

Conclusion

Application/Control Number: 10/828,254

Art Unit: 3725

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Rosenbaum whose telephone number is 571-272-4523. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Derris Banks can be reached on 571-272-4419. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
